

HARVEST ESTIMATE 2020/2021

The harvest begins in November with the Clover Honey, lasting in January. From February until April, Chilca Honey predominates along with Lucera Honey. On the other hand, Multiflora Honey is harvested from November to May.

NUMBER OF DRUMS OF ORGANIC HONEY PER YEAR

Organic Monoflora Clover Honey

150 / 160 drums*

Conventional Monoflora Clover Honey

135 / 145 drums*

Organic Lucera Honey

40 / 50 drums*

Organic Chilca Honey

65 / 75 drums*

Organic Multiflora Honey

80 / 90 drums*

Conventional Multiflora Honey

300 / 320 drums*

*Estimates based on 30 years of beekeeping work in the area. These may vary in cases of natural disasters, or extreme climates (floods and/or droughts).
